ITegrity DELIVERS Results - Selected Case Studies

National Oceanic and Atmospheric Administration

Optimizing Mission-Critical Services – From enhancing radar product software development to providing science communications and outreach to modernizing financial management and analysis tools, ITegrity delivers a spectrum of services across NOAA's mission areas – and we have been for over 16 years. Whether improving security assessment resource efficiency by 20% for the NWS or delivering $2M annual reduction in telecommunication costs for the Automated Surface Observing System (ASOS) – ITegrity's consistently provides an outsized value for the investment across 12 concurrent contracts.

General Service Administration

Enhancing Data Insights for GSA's Best-In-Class (BIC) Telecom Portfolio – ITegrity provides complex analytics, automation, and business intelligence for the Office of Enterprise Technology Solutions (ETS) enabling data-driven strategy and decision-making across GSA's portfolio of telecommunications contracts that collectively represent over $2.8 Billion of yearly sales to federal agencies - analyzing over 250M billing records per month to enhance GSA's service offerings for its Best-in-Class (BIC) telecommunications contracts. ITegrity also contributes to the development and execution of GSA's strategic goals and roadmap for telecommunications.

Department of Defense

Delivering Secure and Trusted IT and Administrative Services to DoD – ITegrity serves multiple DoD agencies providing inventory management, networking, server management, user access, IT hardware maintenance, asset management, web design, research, reporting, and records digitization.
